Time Lapsed

0:00 / 1:01

The video above is the latest addition to *On Screen*, the video-based component of the art program at [Indianapolis International Airport](#) (IND).

Time Lapsed, by Flounder Lee, takes “as-it-happened” footage of activity at IND over a three-month period in early spring of 2013 to create a multi-dimensional portrait of how and where people move through time and space.

Look for *Time Lapsed* on the IND video wall through June 2014.
